The Reco Ming. & Milling Co., Ltd.,

Sandou, B.C.

Gentlemen:-

We take pleasure in mailing you under separate cover, as requested, copy of our new book entitled Wire Rope Transportation in all its Branches. A perusal of this we think will convince you that we have had sufficient experience in the building of wire rope tramways to know how to meet the various requirements. We have added many improvements to the details of construction in recent years, and we consider that we are better equipped to do this class of work than others. We beg to call your attention especially to the Patent Interlocked cable, illustrated and described on page 9, the merits of which alone should give pre-eminence to our tramways. Furthermore, our new Grips do away altogether with the necessity for lugs on the traction rope, which are a constant source of trouble and annoyance, to say nothing of the wear on the rope. When you are ready to consider propositions on the tramway which you say you expect to build about July first, it

Reco, Jan. 14, 1897 #

will certainly repay you to examine carefully into our methods,
and we should be pleased to give you every opportunity for so
doing. We hope to be favored with the profile of the route of
the contemplated tramway, from which we can make you a definite
bid.

Trusting to hear from you at an early date, we are

Yours respectfully,

Trenton Iron Co.
